

CATALOG-BASED SERIES SELECTION DATA

# QJ25-J Memory

Relays with retained trip indication

Retains the oil-surge trip indication through a memory mechanism, with reset after the fault is cleared.

## 01 Models covered

QJ4-25-J, QJ4G-25-J, QJ5-25-J, QJ6-25-J, QJ7-25-J, QJ7G-25-J, QJ8-25-J

## 02 Catalog specifications

| Parameter             | Catalog value                            |
|-----------------------|------------------------------------------|
| Pipe diameter         | DN25                                     |
| Gas accumulation      | 200-250 mL; not specified for QJ4G / QJ6 |
| Oil velocity setting  | 1.0 +/- 0.1 m/s                          |
| Operating temperature | -40 to +100 degC                         |
| Signal memory         | Retained trip indication with reset      |

**Selection note:** The source does not give a gas-volume value for QJ4G-25-J or QJ6-25-J. Confirm the reset and contact arrangement.

Catalog source: PDF spread(s) 18; printed pages 29-30. This is selection information; request approved model-specific installation documents before procurement or installation.
